

Return Management System (RMS)

Pragma Return Management System (RMS)

India's only **100% Automated RMS** for D2C.

From refunds to logistics to insights — every step in the return cycle runs itself. **Zero manual effort, maximum customer satisfaction.**

Flexible Refunds & Exchanges

Handle every return scenario with ease.

- Refund to source, UPI, wallets, credits, or gift cards
 - **Advanced exchanges:** SKU swaps, value variance, style/size changes
 - “Exchange on Exchange” for iterative replacements or part-refund + part-exchange
-

Retention Over Refunds

Turn returns into repeat business.

- Smart suggestions **highlight exchanges over refunds**
 - Offer store credits and coupon nudges during the return flow
 - Boost retention with discounts triggered at exchange moments
-

Intelligent Logistics Routing

Precision logistics, reduced cost.

- **Dynamic courier allocation** by pincode, and other criteria
 - **Auto-map** returns to nearest/source warehouse or custom (warehouse) location
 - Optimisations to cut TAT and lower reverse logistics spend
-

Automated Pickup Management

Reverse logistics, fully hands-off.

- Instant RVP generation keeps Ops teams 100% hands-free
 - Non-Pickup Report management for last-mile coordination
 - **Auto-manage AWBs**, cancellations, regenerations
 - Smartly clubbing of multiple return items into one AWB
-

Configurations that reflect your Return Policy

Customise rules, automate approvals.

- Set granular return windows, eligibility, SKU-level rules
 - **Nested reason codes** and file uploads for media-based QC
 - **Two-way OMS sync**: pass/fail updates flow to brand + customer instantly
-

AI-Driven Restrictions

Stop return abuse, reduce fraud.

- **Predictive model** to flag frequent returners or risky SKUs
 - Historic + real-time data ensures policies adapt dynamically
 - Apply tag, value, coupon, or pincode-level restrictions
-

Tagging & Root Cause Analysis

See the “why” behind returns.

- **Granular tag layers**: product issue, cause, courier partner
 - Spot recurring issue patterns (e.g., damage + courier)
 - Negotiate with partners or fix SKUs with data-backed precision
-

Bulk Return Processing

Process large batches instantly.

- Handle recalls, wrong combos, or migration cases
 - Upload CSV, assign return type, and bulk-process
 - Slash manual hours during exceptional spikes
-

Real-Time Insights & Dashboards

Measure, optimise, improve.

- **Live dashboard**: return rates, approval TAT, CSAT
 - Granular insights by SKU, courier, location, or tag
 - Continuous improvement metrics spotlight root causes
-

Seamless Integrations

Plug into the pan-India ecosystem.

- Native with 65+ couriers for forward, return, and exchange
 - Connects to OMS/WMS
 - Refund engines fully integrated
-

Branded Return Pages

Keep returns on-brand.

- Customisable, brand-aligned return pages for customers
 - **Full catalog sync** ensures accurate SKUs, prices, and rules
 - Smooth UX strengthens trust and customer loyalty
-

RTO Suite

Pragma RTO Suite

Control RTOs, NDRs, and SLA breaches — in one suite.

AI-powered risk & fraud flagging, automated re-delivery workflows, and courier performance tracking — giving D2C brands end-to-end transparency.

The screenshot displays the Pragma RTO Suite interface. At the top, it says 'Products > Pragma RTO Suite' and 'Pragma RTO Suite'. Below this, the main heading is 'Control RTOs, NDRs, and SLA breaches — in one suite.' followed by the subtext: 'AI-powered risk & fraud flagging, automated re-delivery workflows, and courier performance tracking — giving D2C brands end-to-end transparency.'

The dashboard shows an 'Order Details' view for order DON19908. It includes sections for 'Flags' (No flags for this order), 'Order history across ecommerce' (Total orders: 22, Orders w/o end states: 4, Orders w/ end states: 18, Delivered: 16, Cancelled: 2, RTO: 0), 'Items' (Elite Gel 180), 'Status' (Ready for Shipment), 'Customer' (Mithali Rajan Thakur), and 'Shipping Address'. A callout on the left points to the 'Flags' section with the text '80% tickets automated'. A callout on the right points to the 'Status' section with the text '80% tickets automated'.

At the bottom, logos for FACESCANADA, emami, and NEEMAN'S are displayed.

Risk & Fraud Intelligence Stage 1 - Checks & Validation

Catch risky orders in real time with data from 1000+ brands

- Device and **behaviour fingerprinting** flags fraud instantly
- Auto-correct + validate addresses and pincodes
- Instant phone verification via OTP-less / Truecaller flows
- **Dynamically disable COD** for risky consumers
- AI-driven scoring refines risk thresholds using live + historic data

Risk & Fraud Intelligence — Stage 2 - Adaptive AI & Suppression

Move from static checks to adaptive intelligence.

- **Detect serial abusers** with signals across 1000+ brands

- **Context-aware COD limits** adjust by order value, region, or user history
 - Smart suppression blocks risky users from COD, discounts, or promos
 - Dynamic rules adjust in real time for sales, festivals, or surge traffic.
 - Turn blocked risks into recovered revenue with automated **COD-to-prepaid nudges**
-

RTO Analytics & Dashboards

Clear visibility, better control.

- Pincode and SKU-level RTO data
 - Courier and **channel-wise NDR + SLA** breach insights
 - Real-time flagged vs blocked order trends
-

Automated Verification & NDR

No more failed deliveries.

- Customers **confirm orders or re-slot** via WhatsApp
 - Failed deliveries trigger SKU/location/sale/customer specific reattempts
 - **Courier + OMS + RMS** updated in real time
-

AI Decision Engine - Tuned for Indian D2Cs

Smarter with every order.

- **Predictive AI** tunes fraud thresholds dynamically
 - Escalates only edge cases to manual review
 - Optimises approvals and blocks using live + historic data
-

Seamless Integrations

Fits perfectly into the entire stack.

- Sync with **OMS, WMS, CRM, RMS**
 - Aligns across platforms for instant risk checks for orders
 - Real-time courier API sync for NDR and SLA breach tracking
 - Two-way sync with OMS/WMS ensures instant order updates and risk status alignment
-

COD to Prepaid Conversion

Turn risky COD into safer prepaid.

- Smart nudges via WhatsApp, SMS or email
 - Context-aware offers switch orders to prepaid
 - Brands convert **25–35% COD** into prepaid safely
-

Advanced Capabilities

Push beyond basic RTO tools.

- **Payment fallback orchestration** for failed gateways
 - Visual QC with photo/video evidence for returns
 - Run A/B experiments to refine risk & fraud rules
 - Self-service returns with QR/label-less options
 - Enable “returnless refunds” for low-value items
-

ShipAxis

Pragma ShipAxis

AI-Driven Shipping, Courier Intelligence & Fulfilment Control for Indian D2C

Ship faster, spend less, and eliminate fulfilment blind spots with intelligent courier allocation, SLA control, and real-time shipping intelligence — built specifically for India's D2C logistics complexity.

Intelligent Courier Orchestration

Right courier. Right order. Every time.

- Auto-assign couriers based on pincode, SKU, weight, payment mode, and historic performance
- Real-time SLA intelligence from 1500+ Indian D2C brands
- Dynamic re-routing during sales, surges, or courier outages
- Prepaid-first courier mapping to reduce RTO risk

Brands see 18–25% lower shipping costs and fewer delivery failures

Delivery Performance Engine

Control SLAs before they break.

- Pincode-level delivery TAT prediction
 - Courier-wise delay, NDR, and RTO benchmarks
 - Auto-escalation for SLA breaches
 - Live ETA recalibration based on ground signals
-

RTO & NDR Suppression at Shipping Level

Stop losses before dispatch.

- Risk-aware courier allocation for COD orders
 - NDR-triggered workflows: WhatsApp confirmation, reattempts, re-routing
 - Suppress poor-performing couriers for risky zones automatically
 - Syncs with Pragma RTO Suite for end-to-end control
-

Multi-Warehouse & Zone Intelligence

Fulfil closer. Deliver faster.

- Auto-select optimal warehouse by proximity, stock, and SLA promise
 - Zone-based cost optimisation
 - Support for dark stores, brand warehouses, and 3PLs
 - Split shipments intelligently for speed vs cost trade-offs
-

Smart Label, AWB & Manifest Automation

Zero ops friction at scale.

- One-click AWB generation across all couriers
 - Auto-manifesting and handover readiness
 - Label formats configurable by courier and warehouse
 - Exception handling for cancellations, reassignments, and reprints
-

Cost & Margin Intelligence

Shipping visibility that finance teams love.

- Courier-wise cost leakage detection

- Weight discrepancy audits (dead weight vs volumetric)
 - Invoice reconciliation and overcharge flagging
 - Shipping cost impact mapped to order margin
-

Analytics & Dashboards

Every shipment, fully transparent.

- Live dashboards for delivery rate, RTO, NDR, SLA breaches
 - Drill-down by courier, SKU, warehouse, pincode
 - Identify underperforming lanes instantly
 - Export-ready insights for Ops, Finance, and Leadership
-

Seamless Integrations

Built for India's logistics ecosystem.

- Native integrations with 65+ Indian courier partners
 - Deep sync with OMS, WMS, RMS, CRM
 - Two-way status updates across fulfilment stack
 - APIs & webhooks for custom logic
-

ShipAxis Intelligence Layer

Continuously learning from India's largest D2C dataset.

- Models trained on millions of shipments
 - Adaptive courier scoring updates daily
 - Automatically adjusts during sales, festivals, and disruptions
-

Omnichannel CRM

Pragma Omnichannel CRM

One inbox for every customer, across every channel.

Powering 1500+ D2C brands with **unified profiles, context-rich support, and intelligent automation** that drives conversions and retention.

Unified Customer Profiles

See every interaction in one place.

- **Merge orders, returns, tickets, campaigns** into a single profile
 - Identity stitching across channels, devices, and aliases
 - Real-time updates keep context fresh with every action
-

Pragma AI Copilot

Your agents' smartest assistant.

- **Simple search pulls instant answers** from tickets, KB, and policies
 - Suggests on-brand replies and next actions, multilingual
 - **Auto-action macros** tied into OMS, RMS, and CRM — resolve 10× faster
-

Workforce Intelligence

Plan and staff with precision.

- Pragma AI Copilot calculates avg. time for ticket Handling
 - **Forecast volume** by channel, issue type, and seasonality
 - Schedule agents to meet SLAs without overstaffing
 - **Real-time alerts** highlights based on urgency and surges
-

Pragma Journey Management System

Your Marketing Agency + Automation without limits.

- **Campaigns and journeys built from scratch**, tailored to your brand
- Monitored continuously for optimisation and uplift
- Reported with precision, tying every action back to revenue
- Build drip and lifecycle journeys: cart recovery, win-back, replenishment
- Trigger flows from carts, tickets, deliveries, refunds in real time

Campaigns & CTWA Attribution

Track every click to every order.

- Stitch CTWA ads directly to WhatsApp chats and orders
- Multi-campaign attribution links ad → chat → purchase
- Suppress promos for users in return/refund flows automatically

Conversation Analytics & QA

Make every chat count.

- Dashboards for **FRT, AHT, CSAT, SLA** breaches and more
- Auto-score conversations for quality & sentiment trends
- Coach agents with replay, benchmarks, and AI feedback

Payments & Commerce

Enable seamless transactions inside chat.

- In-chat UPI and card payments with fallback orchestration
- ~~Prevent prepaid failures with fallback/cascading gateways~~
- ~~Real-time OMS/WMS sync ensures no out of stock errors~~

Integrations & Extensibility

~~Fits into your stack, no hacks:~~

- ~~Native connectors for OMS, WMS, RMS, payments, logistics~~
 - ~~APIs + webhooks for custom workflows~~
 - ~~Data flows into CRM, journeys, and support in real time~~
-

JMS

Pragma Journey Management System (JMS)

Revenue-Focused Customer Journeys, Continuously Optimised for Indian D2C

Your marketing automation layer. A system that doesn't just run campaigns — it plans, executes, monitors, and improves customer journeys end-to-end, using learnings from 1500+ Indian D2C brands.

The screenshot displays the Pragma Journey Management System (JMS) interface. At the top, it says 'Products > Pragma Journey Management System (JMS)'. Below this is the title 'Pragma Journey Management System (JMS)' and the subtitle 'Revenue-Focused Customer Journeys, Continuously Optimised for Indian D2C'. A descriptive text states: 'Your marketing automation layer. A system that doesn't just run campaigns — it plans, executes, monitors, and improves customer journeys end-to-end, using learnings from 1500+ Indian D2C brands.' The main part of the interface is a workflow editor. On the left, there's a sidebar with a 'Start a new Workflow' button and a list of triggers: 'Whatsapp Request Welcome', 'Order Fulfilled', 'Webhook', 'Broadcast', and 'RMS Request Created'. The central workspace shows a visual flowchart with steps like 'Condition', 'Webhook', 'WhatsApp Template Message', and 'Send Email'. On the right, there's a 'Send Email' step with a 'Send Email' button. Two callouts with arrows point to the workflow, each stating '80% tickets automated'. At the bottom, there are logos for 'FACESCANADA', 'emami', and 'NEEMAN'S'.

Revenue-First Journeys

Every journey tied to outcomes.

- Cart recovery, COD-to-prepaid, win-back, replenishment, upsell
- Journeys mapped to revenue moments — not arbitrary timelines
- Triggered by real-time events: checkout, delivery, returns, refunds
- Built and monitored by D2C growth specialists

Journeys evolve automatically as behaviour, seasonality, and performance shift.

Real-Time Event Triggers

No delays. No missed intent.

- Trigger journeys from OMS, RMS, CRM, Checkout, Logistics
- Behavioural + transactional signals combined
- Micro-moment targeting: drop-offs, delays, failures, returns
- No batch delays, no stale campaigns

Built for brands that want outcomes, not dashboards.

WhatsApp-First Automation

Built where Indian consumers respond/convert.

- Native WhatsApp journeys with buttons, payments, deep links
 - COD confirmation, prepaid nudges, delivery updates
 - 99%+ open rates, highest ROI channel for Indian D2C
-

Lifecycle Intelligence

From first order to loyal customer.

- Segment users by lifecycle stage automatically
 - Adjust messaging tone, offers, and frequency dynamically
 - Prevent fatigue with smart suppression logic
-

Experimentation & Optimisation

Growth without guesswork. Performance that compounds.

- Built-in A/B testing for journeys, offers, timing
 - Measure lift at revenue, conversion, and retention level
 - Automatically promote winning variants
-

CTWA & Revenue Attribution

Know exactly what drives sales.

- Stitch Meta ads → WhatsApp → checkout → order
- Multi-touch attribution across campaigns
- Clear ROAS visibility — understand what truly drives conversion, not just clicks
- Enables smarter budget and channel decisions

Operations-Aware Marketing

Growth that doesn't break fulfilment or CX.

- Automatically suppress promos for users in return/refund flows
- Delay nudges during courier delays or SLA breaches
- Aligns perfectly with Ops and CX

Analytics & Reporting

Clear answers, not vanity metrics. Every journey accountable.

- Revenue, conversion, retention dashboards
- Channel-wise, journey-wise, and cohort-based insights
- Benchmarked implicitly against similar D2C brands
- Exportable reports for leadership

Integrations & Extensibility

Deeply embedded across the stack.

- Native sync with Checkout, CRM, RMS, ShipAxis
- APIs for custom triggers and journeys
- Real-time data flow across stack - zero lag

The Pragma JMS Advantage

What sets Pragma JMS apart isn't just automation — it's **accumulated decision intelligence**.

- **Scales trust** → Patterns learned from across 1500+ Indian D2C brands

Journeys informed by what actually works at scale in India

Continuous cross-brand learning feeds system-wide improvements

- **Feels like an agency** → strategy, execution, optimisation, accountability
- **Reads like software** → systems, intelligence, automation, data

You're not starting from scratch. You're building on proven growth playbooks — executed automatically.

WhatsApp Business Suite

Pragma WhatsApp Business Suite

Where India's **400M+** shoppers chat, discover, and buy.

Powering D2C brands with **instant commerce, seamless payments, and always-on support** — all inside WhatsApp.

Campaigns & CTWA

See **11x ROAS** on WhatsApp campaigns — the best across channels.

- Run **Click-to-WhatsApp Ads** that open directly in chat
- Broadcast promos or segment by **pincode, SKU, lifecycle**
- With 99%+ open rates, brands see **higher ROI** than any other channel

Automated Journeys

No lead or order intent slips away.

- Create unlimited drip campaigns - for **cart recovery, replenishment, win-backs** etc.
- Trigger flows from **orders, deliveries, returns** in real time
- Escalate to appropriate agents seamlessly

Conversion Boosters

See **15%+ more conversions** and **40% cost savings**

- Push prepaid with **one-tap payments** and tailored offers
- Reduce COD risk with prepaid-first flows
- Auto-verify addresses to cut fraud and ops rework
- Recover carts with targeted nudges

WhatsApp Commerce

A **complete shopping experience** inside WhatsApp.

- Customers can **browse, order, pay, track** without redirection
- Use **item-level triggers** for reviews, replenishment, and loyalty

Operations-Aware Messaging (RTO + Returns)

Flows designed for D2C realities.

- Confirm **risky COD addresses** before shipping
- Suppress promos when customers are mid-return etc.
- Trigger item-level delivery or review updates to cut RTO and boost fulfilment

Pragma's AI Copilot for Agents

Your team's smartest inbox companion.

- Suggests on-brand, **multilingual** replies in real time.
- Pulls past resolutions and order history instantly.
- Agents resolve **13X** faster, customers get consistent and personal answers.

Catalogues & Collections

Your entire store — always two taps away. Showcase catalogues synced with your store.

- Group products into collections for quick discovery.
- Showcase live catalogues synced with SKUs, variants, prices etc
- Curate **collections** for faster discovery.
- Auto-sync ensures products and pricing are **always current**

Payments

WhatsApp, but Pragma's checkout ops behind the scenes.

- Accept **UPI and card payments** directly in WhatsApp
- Provide **smart fallback** links for failed gateways
- Prevent drop-offs and boost **prepaid order share**

Support on WhatsApp

Automate to scale support **4x** while resolving issues faster and consistently.

- Automate **75%+ of routine queries** with bots
- Give agents **Pragma's AI copilot** for 13X quicker resolutions

Meta Shops Integration

One setup — consistent journeys everywhere.

- Sync catalogues across **Facebook, Instagram, WhatsApp**.
 - Keep pricing, stock, and offers aligned.
 - Ensure customers see 1 brand across the board
-

1Checkout

1Checkout by Pragma

Intelligent, Rapid & Secure Checkout for Ecommerce

Cart to purchase in **under 5 seconds**, cut RTOs with **built-in risk intelligence**, and make every order **prepaid-first by design**.

Lightning-Fast Checkout

Frictionless. Mobile-first. Distraction-free.

- Complete checkout in <5 seconds, no redirects
 - **Auto-login** enabled for 65%+ returning users
 - **Auto-fill addresses** for 8/10 shoppers instantly
-

Conversion Boosters

Turn drop-offs into conversions.

- Highlight prepaid-first flows to cut COD reliance
 - Recover abandoned carts with targeted nudges
 - See **15%+ more conversions** and **30% fewer abandons**
-

RTO & Fraud Prevention

Stop risky orders before they happen.

- **Device and behaviour fingerprinting** data from 1000+ brands
 - Auto-correct invalid addresses & verify via Truecaller/OTP-less flows
 - Dynamically disable COD for high-risk profiles
-

Smart Payments & Orchestration

Never lose an order to gateway failure.

- Support UPI, cards, wallets, BNPL with **fallback routing**
 - **Prepaid-first nudges** with instant cashback or offers
 - Cascading gateways ensure 100% success rates
-

Address Intelligence

Accuracy built-in, at scale.

- Auto-suggest addresses based on past history
 - Correct gibberish & validate pincodes instantly
 - **Map shipping costs** by payment type & courier
-

Indian D2C Network Advantage

One ID, checkout everywhere.

- Shopper details carry **across all Pragma brands**
 - Faster first purchases — no retyping info
 - Improves trust & repeat rates across the ecosystem
-

Analytics & Optimisation

Know exactly where you win or lose.

- **Funnel drop-off insights** at each checkout step
 - Track gateway success/failure rates in real time
 - Test checkout variations with built-in A/B experiments
-

Customisable UI

Checkout that matches your brand's vibe.

- Fully skinnable with brand colours, banners, fonts
 - Configure fields, offers, and flows to suit categories
 - Optimised for speed, clarity, and distraction-free focus
-

Seamless Integrations

Plug into your stack without friction.

- Native with Shopify, custom stores, and OMS/WMS
 - Works with Razorpay, Cashfree, Paytm, BharatX, Snapmint
 - Syncs with GA4, Meta Ads, and analytics platforms
-

Genie

Pragma Genie (AI-Copilot)

AI Copilot for D2C Operations, Support & Growth

An always-on intelligence layer that augments agents, ops teams, and marketers — resolving faster, deciding smarter, and scaling effortlessly.

Instant Context, Zero Searching

Every answer in one prompt.

- AI-powered context retrieval across orders, returns, tickets, policies, and journeys
- Uses entity resolution and identity stitching to unify customer, order, and interaction data
- Works across the board, eliminates manual lookup through real-time semantic search
- No tab switching, no manual digging

Genie applies **natural language understanding (NLU)** to map questions to the right operational data instantly.

Agent Assist & Auto-Resolution

Generative AI Support that resolves at 10× speed.

- AI-generated replies and next-best actions in real time
- Multilingual, brand-aligned responses trained on historical resolutions
- ML-driven confidence scoring before auto-triggering refunds, replacements, or escalations
- Auto-trigger refunds, replacements, escalations
- Resolve tickets 13× faster

Actions are executed when Pragma Genie's **decision confidence thresholds** are met.

Decision Intelligence for Ops

AI that reasons, predicts, and acts.

- Machine learning models recommend courier reassignments and policy overrides
 - Anomaly detection flags abnormal spikes in returns, delays, or failures
 - Predictive escalation logic surfaces only true edge cases to human teams
 - Learns from approvals, rejections, and downstream outcomes
 - Escalates only true edge cases to humans
-

Quality, Sentiment & Coaching

AI-led consistency across every interaction.

- ML-based conversation auto-scoring for tone, accuracy, compliance
 - Sentiment analysis **identifies churn risk** and escalation probability early
 - AI-driven coaching highlights gaps using real conversation examples
 - Continuous feedback loops improve agent performance over time
-

Workforce Intelligence

Predictive staffing powered by machine learning.

- ML models forecast ticket volumes by channel, issue type, and seasonality
 - Predict handling time by issue type etc
 - Optimise rosters dynamically to meet SLAs without overstaffing
 - Alerts teams before SLA risk materialises
-

Revenue & Retention Intelligence

AI that understands commercial intent.

- Context-aware recommendations for upsells, exchanges, or credits
 - Predictive refund prevention by identifying saveable interactions
 - Aligns CX with revenue goals
 - Learns which resolutions maximise long-term LTV
-

Learning from 1500+ Brands

Smarter every day. Models trained on real outcomes, not theory.

- Machine learning models trained on India-specific D2C behaviour
- Continuously adapts to new SKUs, behaviours, and policies
- Cross-brand learning improves accuracy without exposing brand data
- Learns from outcomes, not assumptions

Genie doesn't rely on static rules. It evolves with every resolved interaction.

Security & Control

Responsible AI by design. Enterprise-grade by default.

- Role-based access and permissioned actions
 - Full audit trails for every AI-assisted or AI-executed decision
 - Policy-aware guardrails prevent unsafe or non-compliant actions
 - Enterprise-grade controls for trust and accountability
-

Integrations

One AI brain across the entire commerce stack.

- Native integrations with CRM, OMS, RMS, Checkout, ShipAxis, and JMS
 - APIs and webhooks for custom AI-driven workflows
 - Real-time data sync ensures models act on live truth, not lag
-
